Extension description

This extension allows you to add additional fields to shipping section on the checkout page. You can use it to give ability to add comments to order for customer, add delivery dates and many more. Date, datetime, text, textarea, dropdown, multiselect, checkboxes, radiobuttons shipping options are supported.

Extension installation

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process compliance, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

Step By Step configuration

After successful installation you will see new menu: Catalog -> Shipping Options. Here you can view existing shipping options and add new ones.

Options [Add New](#)

Page of 1 pages | View per page | Total 7 records found [Reset Filter](#) [Search](#)

ID	Type	Name
From: <input type="text"/>	<input type="text"/>	<input type="text"/>
To: <input type="text"/>		
2	Text area	Test Text area
3	Dropdown	Test Dropdown
4	Date	Test Date
5	Date & Time	Test Date & Time
6	Multiselect	Test Multiselect
7	Checkboxes	Test Checkboxes
8	Radio buttons	Test Radio buttons

While adding new shipping option you can set Name, select shipping option type and to set default values. Default value for text and textarea will show this value in inputs of text and textarea types on frontend. Default Values for dropdown, multiselect, radiobuttons and checkboxes will add one or several fields of such types to frontend, where default value will be label of options. Use ';' delimiter to add several fields. For date and datetime types this option does not work.

Extension uninstall

1. Remove application files from your store file system (all files, which you have in extension pack)

2. Run the following query on your database

```
DELETE FROM `core_resource` WHERE `core_resource`.`code` = 'magalter_customshipping_setup'
```
