## Extension description

With simple tabs Magento extension installed it is very easy to create interactive tabs with desired contents and place them at any page of your store. All it takes is to create a setting in global configuration which consists of 5 fields: tab name, products (ids comma-separated), cms blocks (identifiers comma-separated), identity and sort order. You can add unlimited number of settings in one tab set, create tabs with several rows or even several separate tabs at one page.

### Main features:

- Flexible configuration;
- Complete multi-store support;
- Sort order;
- Dynamic tab set configuration.

## Tabs with multiple rows

Cell Phones

Work with experienced developers

Our developer team works with Magento plug-ins for a period of over 2-years. This allows us to develop bug-free software products with great user experience and make our clients happy. But it is not only about the experience and software development skills – we love what we do.

**Great Support**

We love our clients just as you love your own clients. And with complex software products like Magento they often need help figuring things out. And we help you with this task. Whether you need just to install one of our plug-ins or want to setup it right – our support service is always there to help providing you with best advise on making your e-commerce as convenient as possible.

Looking for high quality [magento extensions](#) and [customization services](#)? Want to take your ecommerce to the next level?

Magalter offers flexible solutions for our customers. Take control over your business with Magalter Co. magento extensions. Order various magento customizations and features for existing projects. Create a feature-rich store that provides customers with an intuitive online shopping experience.

We are serious about quality of the offered extensions, since we want your business to thrive. In other words, we offer only the highest-quality product that allows your Magento-based store to function just as you intended. All our developers, testing engineers and support team workers are highly experienced and magento extensions that we publish pass through several stages of code review and testing. We try to keep the code clean and avoid rewrites and hardcode that leads to conflicts between applications. Every extension has a detailed user guide and staging demo site so you can try it in action before buying.

#### Work with experienced developers

Our developer team works with Magento plug-ins for a period of over 2-years. This allows us to develop bug-free software products with great user experience and make our clients happy. But it is not only about the experience and software development skills – we love what we do.

#### Great Support

## Extension installation

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process compliance, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

## Step By Step configuration

To create your first set of tabs log into administrator area and navigate to System → Configuration → Simple Tabs.

- ✓ Set “Enable” option to “Yes”;
- ✓ Click add tab button.

Now you should see a simple tab control option:

Simple Tabs

General settings

Enable: Yes

Simple Tabs

Tab name	Products	Cms blocks	Tab identifier (optional)	Sort order	
					<input type="button" value="Delete"/> <input type="button" value="Add tab"/>

Products - ids, comma separated  
Cms blocks - identifiers, comma separated  
If both cms and products are specified, cms content will be displayed first

**Tab name** – your visitors will see it as a tab heading;

**Products** – here you can place comma-separated product ids;

**Cms blocks** – here you can place cms blocks identifiers (or ids);

**Tab identity** – this field is optional, but if you want to display only specific tabs in your tab set, please enter some unique identifier;

**Sort order** – Tabs with lower sort order will be display in first place within a tab set.

Example of tab configuration:

Simple Tabs

General settings

Enable: Yes

Simple Tabs

Tab name	Products	Cms blocks	Tab identifier (optional)	Sort order	
Best sellers	17	cms_contents	a	1	<input type="button" value="Delete"/>
New products	164,165,168,158		b	2	<input type="button" value="Delete"/>
Free products	164,165,168		c	3	<input type="button" value="Delete"/>
Tab 1		dev-team	d	4	<input type="button" value="Delete"/> <input type="button" value="Add tab"/>

Products - ids, comma separated  
Cms blocks - identifiers, comma separated  
If both cms and products are specified, cms content will be displayed first

For simple tabs to be displayed just put the following code into any phtml file or static block.

Code for static blocks and cms pages:

```
{{block type="magalter_simpletabs/tabs"  
template="magalter_simpletabs/tabs.phtml" }} – this code will output all configured tabs.
```

```
{{block type="magalter_simpletabs/tabs"  
template="magalter_simpletabs/tabs.phtml" tabs="a,b,c,d"}} – this code will output only tabs with identifiers a, b, c and d.
```

You can even place several tab sets at one page. It is easy!

```
{{block type="magalter_simpletabs/tabs"  
template="magalter_simpletabs/tabs.phtml" tabs="a,b,c,d"}}
```

```
{{block type="magalter_simpletabs/tabs"  
template="magalter_simpletabs/tabs.phtml" tabs="m1,m2,m3,m4"}}
```

Code for phtml files:

```
<?php echo $this->getLayout()->createBlock('magalter_simpletabs/tabs')-  
>setTemplate('magalter_simpletabs/tabs.phtml')->toHtml(); ?> – this code will output all configured tabs.
```

```
<?php echo $this->getLayout()->createBlock('magalter_simpletabs/tabs')-  
>setTemplate('magalter_simpletabs/tabs.phtml')->setTabs(' a,b,c,d')->toHtml(); ?> – this code will output only tabs with identifiers a, b, c and d.
```

You can even place several tab sets at one page. It is easy!

```
<?php echo $this->getLayout()->createBlock('magalter_simpletabs/tabs')-  
>setTemplate('magalter_simpletabs/tabs.phtml')->setTabs(' a,b,c,d')->toHtml() ; ?>
```

```
<?php echo $this->getLayout()->createBlock('magalter_simpletabs/tabs')-  
>setTemplate('magalter_simpletabs/tabs.phtml')->setTabs(' m1,m2,m3,m4')-  
>toHtml() ; ?>
```

## **Extension uninstall**

Remove application files from your store file system (all files, which you have in extension pack)
