Extension description

Magento platform has a very flexible and user-friendly interface for managing different product attributes which is not so great when we talk about product grid. All new attributes are not visible and user should go to the edit to see their values. With the help of Magalter Advanced Product Grid store administrators can easily add new attributes in grid and make them searchable and sortable. Sound good isn't it? Store administrators can even create bookmarks which store desired column set.

Main features:

- All types of product attributes are supported (except complex attribute rules);
- Bookmark functionality;
- Unlimited number of predefined columns and attributes;
- Complete multistore support.

Extension installation

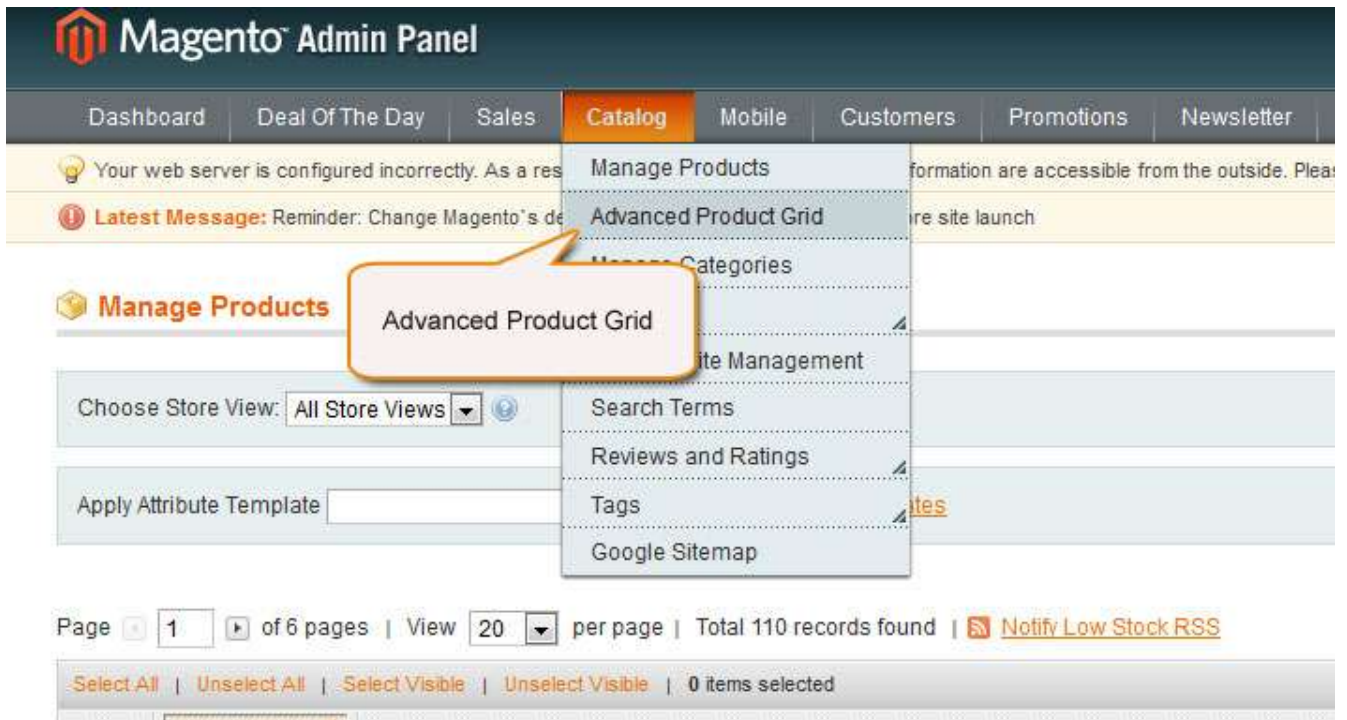

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process compliance, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

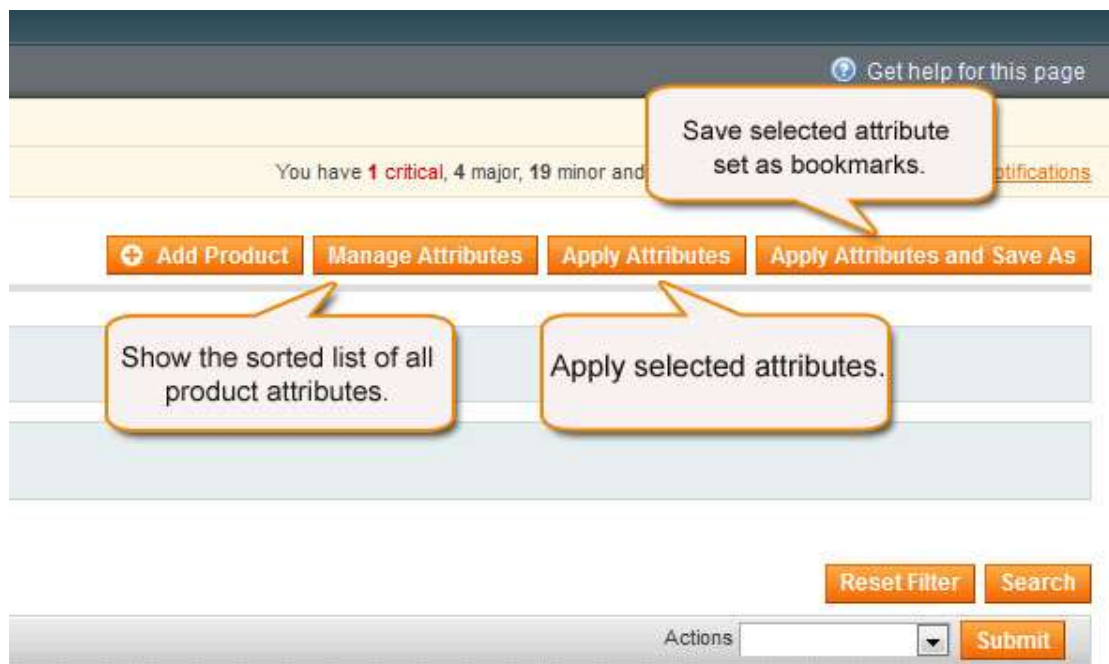

Advanced Product Grid

Extension configuration options

After you have installed the application, log into administration panel > Catalog > Advanced Product Grid.

By default you can see a well-known product grid. But do not be upset have a better look around. First of all take a look at the buttons set at the upper right corner.

Advanced Product Grid

So let us get started. Just click "Manage Attributes" button and you should see the sorted list of all product attributes below it.

You can add some additional product attributes to default column set or event hide default columns from view. Just mark the columns you would like to see in the grid and click "Apply Attributes and Save As". Now you can see a pop-up window where you can enter custom grid name. Click "Ok" or just press "Enter" and look at your completely different product grid. Do not worry default column set can be easily restored. Just select the appropriate options in the list of available bookmarks.

Advanced Product Grid

 **Manage Products**

Choose Store View: All Store Views 

Apply Attribute Template  [Manage Attribute Templates](#)

- Restore Default Column Set
- Custom Grid Column Set**

Page  1  of 6 pages | View  20  per page | Total 110 records found | 

You can manage saved bookmarks by following "Manage Attribute Templates" link.

Note. There are a few limitations

- You can select not more than 60 attributes.
- Some complex attribute rules like taxes, group and tier prices are not supported.

Extension uninstall

Remove application files from your store file system (all files, which you have in extension pack)
