# Advanced Order Grid & Flags

## Extension description

Advanced Order Grid by Magalter Co. is an excellent solution for store administrators who want to customize order grid on-the-fly by adding additional columns with order information. Standard order grid consists of 9 columns. With the help of this extension store administrators can add up to 150 different sortable and filterable attributes and save configured column set as bookmark if there is a need. This extension also allows adding one or several flags to orders in just two clicks.

### Main features:

- Unlimited number of predefined columns and attributes
- Bookmark functionality
- Complete multistore support.

# Advanced Order Grid & Flags

## Extension installation

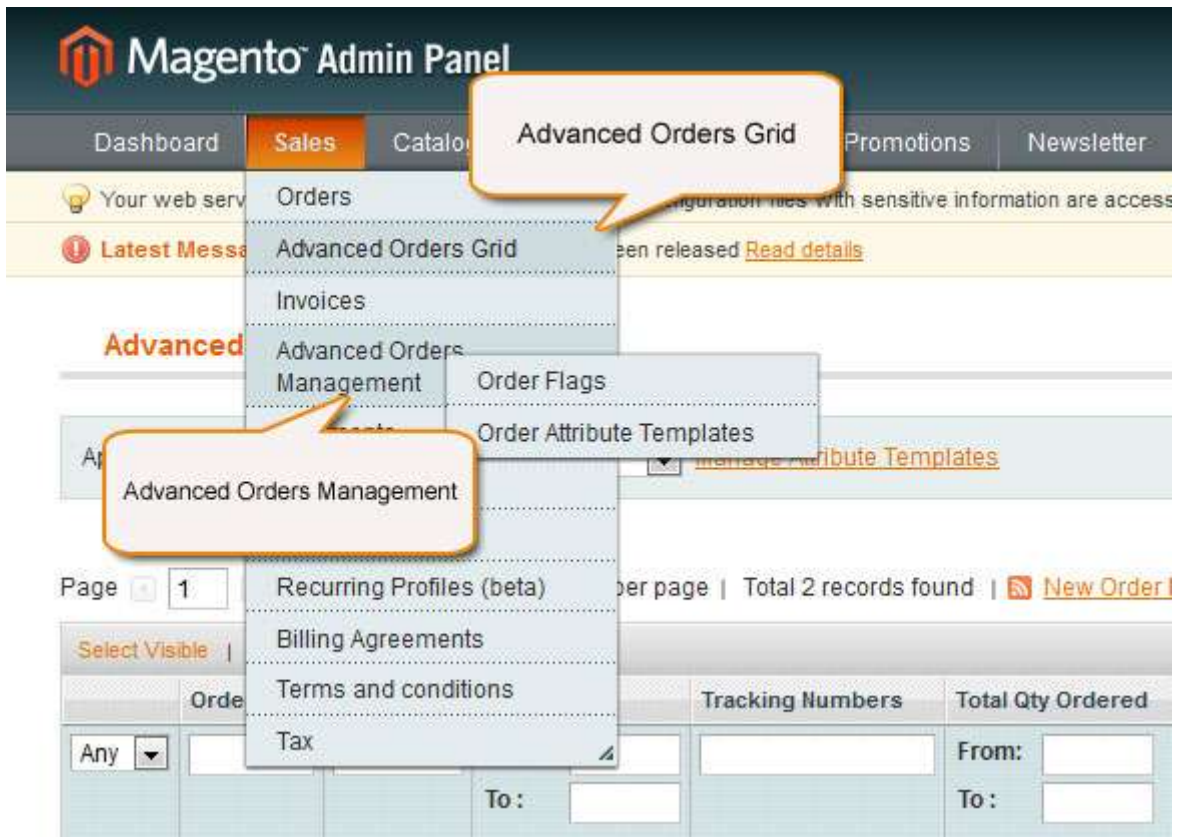

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process compliance, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

# Advanced Order Grid & Flags

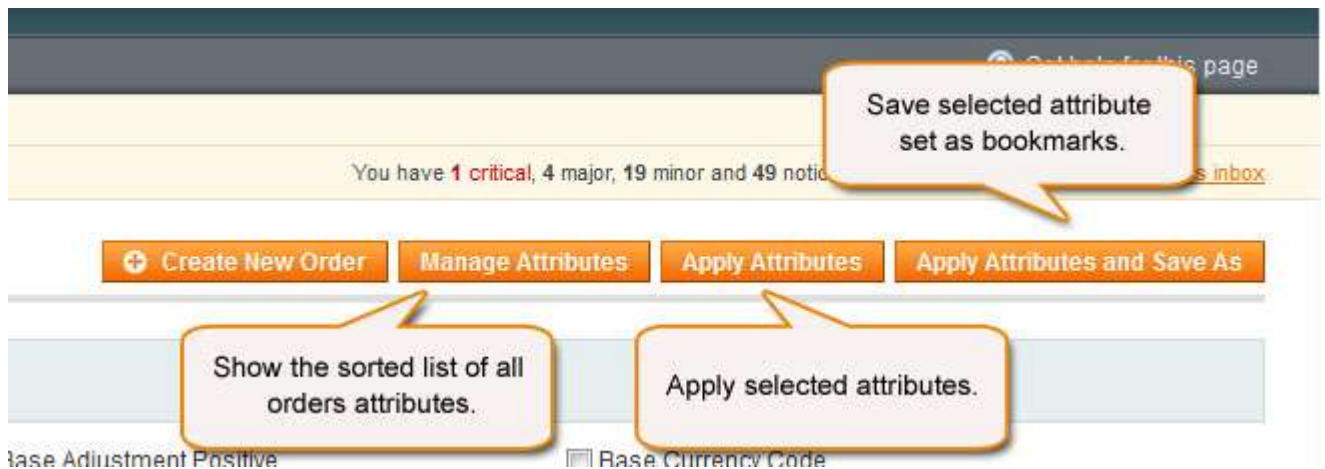

## Extension configuration options

After you have installed Advanced Orders Grid extension, log into administration panel -> Sales -> Advanced Orders Grid.

# Advanced Order Grid & Flags

By default you can see a well-known order grid. But do not get upset have a better look around. First of all take a look at the buttons set at the upper right corner.

So let us get started. Just click "Manage Attributes" button and you should see the sorted list of all product attributes below it.

# Advanced Order Grid & Flags

This is only a part of all available columns store administrator can add. The whole list consists of nearly 150 records. Now all we need to do is simply select desired check boxes and click Apply Attributes button. The result should look something like on the image below.

Page 1 of 1 pages | View 20 per page | Total 3 records found | [New Order RSS](#)

Select Visible | Unselect Visible | 0 items selected

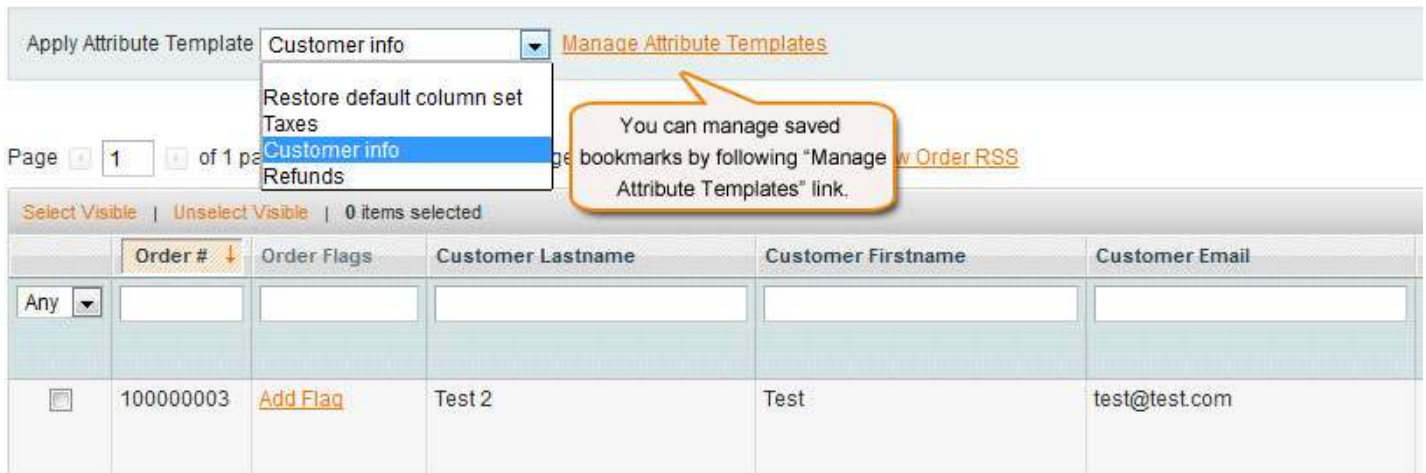

Order #	Order Flags	Customer Lastname	Customer Firstname	Customer Email	Purchased From (Store)	Purchased On

# Advanced Order Grid & Flags

## Order bookmarks functionality

Apply and Save Attributes As button will not only render the grid with desired column set, but also save it as bookmark in database. You can easily add or remove bookmarks from user interface.

### Advanced Order Grid

The screenshot shows the 'Advanced Order Grid' interface. At the top, there is a control bar with 'Apply Attribute Template' and a dropdown menu currently showing 'Customer info'. Other options in the dropdown include 'Restore default column set', 'Taxes', and 'Refunds'. A 'Manage Attribute Templates' link is visible next to the dropdown. A callout box points to this link with the text: 'You can manage saved bookmarks by following "Manage Attribute Templates" link.' Below the control bar, there is a pagination section showing 'Page 1 of 1 page' and a 'Select Visible' section with 'Unselect Visible' and '0 items selected'. The main grid has columns for 'Order #', 'Order Flags', 'Customer Lastname', 'Customer Firstname', and 'Customer Email'. The first row of data shows an order with ID '100000003', a flag 'Add Flag', and customer details 'Test 2', 'Test', and 'test@test.com'.

If you want to restore default column set, simply choose "Restore default column set" option in the drop down list.

# Advanced Order Grid & Flags

## Order flags functionality

By default order has no flags, but you can easily add it. Just click “Add Flag” link and you will see pop-up with all available flags.

Select Visible   Unselect Visible   0 items selected				
	Order # ↓	Order Flags	Customer Lastname	Customer Firstname
Any ▾				
<input type="checkbox"/>	100000003	<a href="#">Add Flag</a>	Test 2	Test

Select desired flags and click apply button. Now you grid should look something like this.
