100000006	HTC Touch Diamond	1	0	0	0	\$650.00

Extension installation

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically.
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

Extension uninstall

Remove application files from your store file system (all files, which you have in extension pack).
