Extension description

In the edit mode of a product there is no information about the orders on this product. With Product Purchases extension the administrators of the stores can easily monitor the activity of sales directly from the product edit page.

Main features:

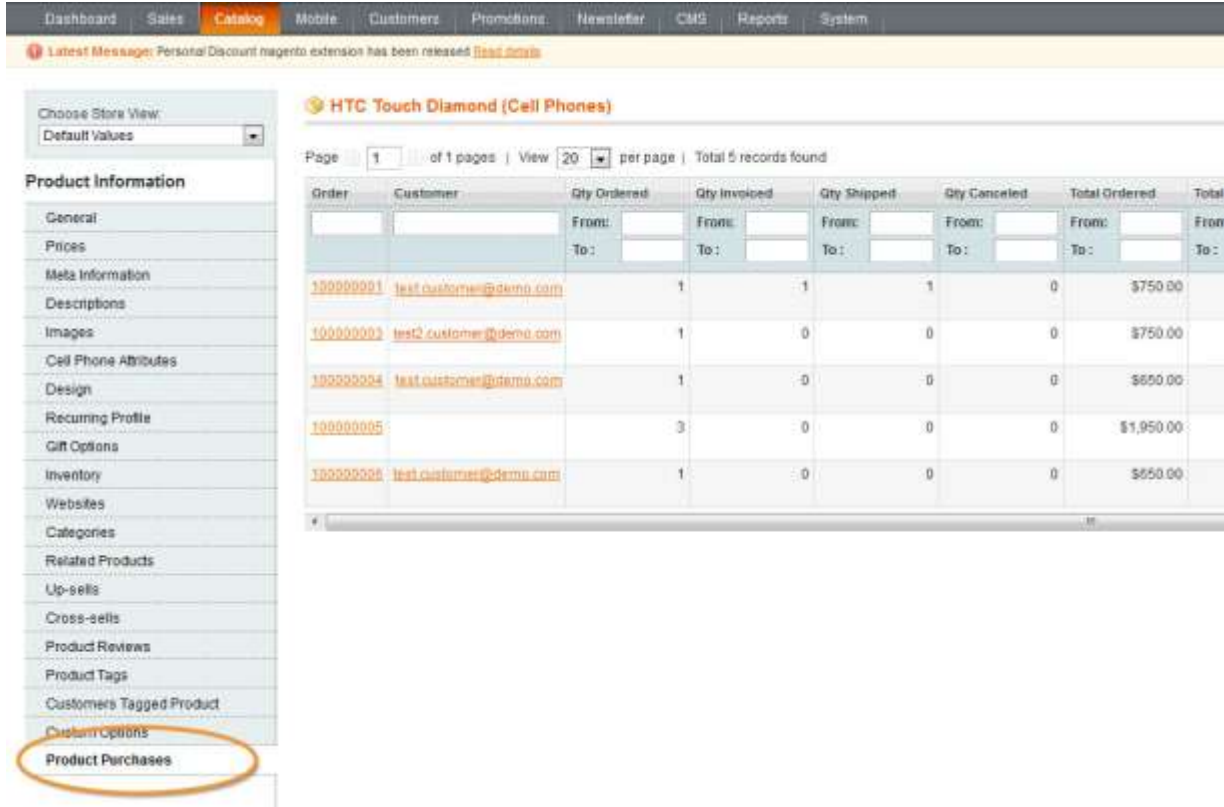

- Filterable and sortable grid with the customer purchased products;
- Complete multi-store support.

Step By Step configuration

1. Log into administration panel and go to Catalog → Manage Products:

2. Edit any product and you will see a new tab 'Product Purchases' with a great amount of data about product sells.

A screenshot of the product edit page for 'HTC Touch Diamond (Cell Phones)'. The page shows a sidebar with various product information tabs, including 'Product Purchases' which is circled in orange. The main content area displays a table of purchase data for the product.

Order	Customer	Qty Ordered	Qty Invoiced	Qty Shipped	Qty Canceled	Total Ordered		Total
		From: To:	From: To:	From: To:	From: To:	From: To:	From: To:	
10000001	test.customer@demo.com	1	1	1	0		\$750.00	
10000003	test2.customer@demo.com	1	0	0	0		\$750.00	
10000004	test.customer@demo.com	1	0	0	0		\$650.00	
10000005		3	0	0	0		\$1,950.00	
10000006	test.customer@demo.com	1	0	0	0		\$650.00	

Extension installation

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically.
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

Extension uninstall

Remove application files from your store file system (all files, which you have in extension pack).
