## Extension description

Log in As Customer magento extension by Magalter Co. allows store administrators with appropriate permissions logging to customer account right from administration panel.

### Main features:

- Log in as customer in Customers Grid
- Log in as customer in Customer Edit Mode
- ACL permissions for store administrators
- Complete Share Customer Accounts support.

## Extension installation

1. Backup your store database and files
2. Unzip extension archive and go into it
3. For security and safety issues your store is needed to be moved into maintenance mode. Just copy 'maintenance.flag' file from extension folder to your store root folder and Magento will put your store to maintenance mode automatically
4. Go to 'source' folder and upload all files and folders from it directly to your store root
5. After copy process compliance, delete 'maintenance.flag' file from your store root folder
6. Clear your store cache

Congratulations! That is it!

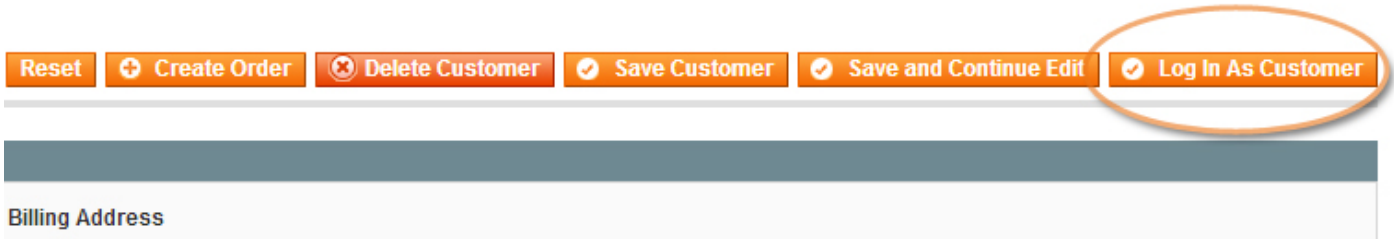

## Extension configuration options

This extension works right after installation, so there is no need to configure any additional settings.

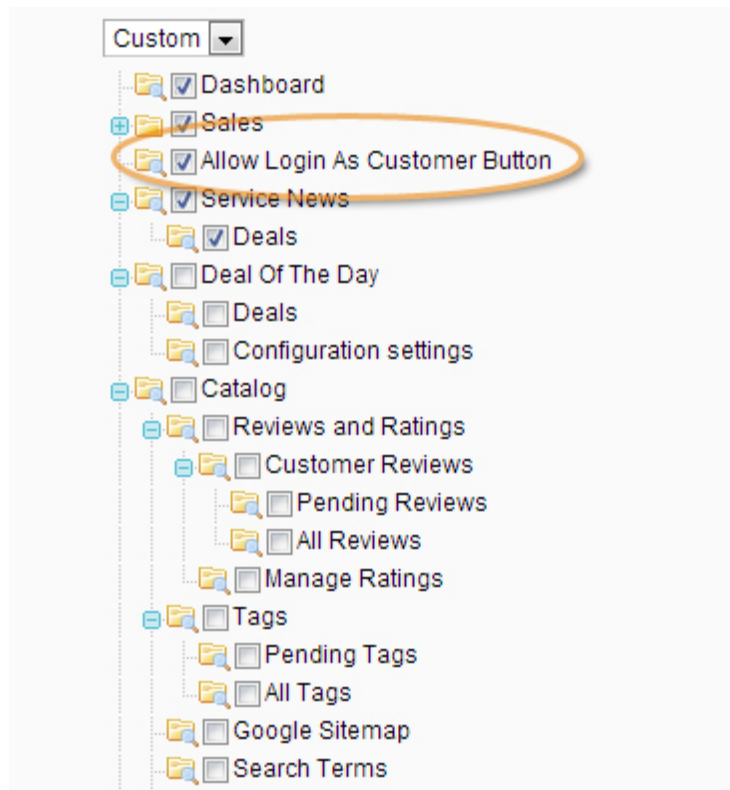

## Log in as customer link in Customer Grid

Customer Since	Action
From: <input type="text"/> To: <input type="text"/>
